HOW TO PACK A RADIO:

European postal standards stipulates that a package, regardless of marking's and warning texts. Sent within the European postal system. Shall resist a drop from no less than 2 meters.

It is therefore of greatest importance that you pack your Radio very, very well. Here are some guidelines that you need to observe.

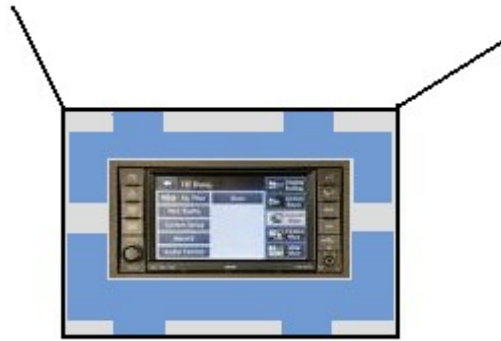

- *** Use chock absorbing material!!
- *** Wrap in plastic bag to protect from water!

The cardboard box must be strong and shield the content. No shoe-box, please!!

We recommend that there shall be at least 5-10 cm space on each side to absorb the chock if dropped.

MARKINGS:

Make sure to mark the parcel both with name, address as well as email. We use email as our primary customer ID.

MARKING's ON THE NAV. UNIT's:

Put the same markings on the navigation units as on the parcel. Mark each nav. with order number. A smart trick is to attach your calling card on the radio
